Summary

As an innovative website developer who adapts quickly to new technologies and environments, I am seeking front-end, back-end, or full-stack opportunities developing scalable, user-centric web experiences.

Technical Skills

Languages: HTML, CSS/Sass (Flexbox, Grid), JavaScript (ES6, jQuery, React), PHP, SQL

Technologies: WordPress, WooCommerce, Shopify, HubSpot, Optimizely, REST APIs, AJAX, Node.js

Tools: Git, Gulp, NPM, Composer, SEO, DNS, Figma, Adobe Creative Suite, Trello, Asana

Professional Experience

Website Developer – Flex Rock UTV Performance, Fountaintown, IN June 2025 – Present

- Develop and maintain multiple SEO optimized WordPress websites, including custom WooCommerce storefronts to continually improve user experience and conversion flow
- Build custom plugins and themes for product logic, inventory tracking, and pricing systems
- Implement dynamic front-end features using JavaScript/jQuery, including AJAX-based cart interactions and product recommendations
- Integrate third-party systems (payments, analytics, shipping, and APIs) to streamline operations

Junior WordPress Developer – JDA Worldwide, Indianapolis, IN April 2023 – May 2025

- Built and enhanced websites, prototypes, and landing pages aligned with client goals and compliance standards that leveraged Google Analytics for performance insights
- Developed custom WordPress solutions using modern front-end (Flexbox, Grid, JavaScript) and back-end tools (PHP, REST API, Composer)
- Created web experiences across CMS platforms and applied object-oriented programming best practices
- Managed deployments and server configurations across GoDaddy, Wix, WP Engine, and Flywheel

Full-Stack Web Developer Intern – TutorDudes, Remote Jan. 2022 – May 2022

- Built features for a real-time communication platform using Node.js, HTML, CSS, and jQuery
- Supported content updates, page enhancements, and file-sharing tool integrations
- Participated in agile development and testing workflows in a remote team environment

Web Designer – Indianapolis Urban League, Indianapolis, IN February 2020 – September 2022

- Assisted the Director of Fund Development and Marketing with re-branding the website and graphic development for agency media
- Used WordPress and WPBakery to create and present designs, edit existing channels, and prepare information for presentations
- Promoted to Web Designer after several semesters functioning as the organization’s Web and Social Media Design/Graphic Intern

Education

Bachelor of Science: Media Arts and Science
IUPUI School of Informatics and Computing
May 2022
